REMARKS

30

Examiner has rejected claims 1-16 under 35 U.S.C. § 103 (a) as being  
unpatentable over USP 5,937,392 to Alberts ("Alberts"). Alberts discloses a system and  
method for banner advertising on a large network such as the Internet, with control of  
the number and frequency of "hits" - thereby providing advantages to the advertiser.  
Examiner believes the disclosure of Alberts implicitly shows all of the elements and  
limitations of claim 1.
